Skills

Python | Html | CSS | JavaScript | MySQL | Git| Tensor flow |Java | C++ | Adobe Photoshop

Introduction

Computer Science undergraduate with a strong interest in software development and problem solving. Skilled in Python, C, JavaScript, and web technologies with experience building real-world projects like an OCR-based Smart Expense Tracker. Passionate about learning new technologies, contributing to innovative solutions, and gaining hands-on industry experience.

Projects

Smart Expense Tracker / [Link](#) / [Code](#)

Feb 2026

JavaScript | HTML | Tailwind CSS | Tesseract.js

- Built a multi-user expense tracker with authentication and persistent data storage via localStorage.
- Implemented OCR-powered receipt scanning using Tesseract.js to automatically extract transaction amounts and dates.
- Designed an interactive dashboard with real-time budget tracking, monthly reports, and category-based expense breakdowns.

CivicConnect / [Link](#) / [Code](#)

Mar 2026

JavaScript | HTML | Tailwind | CSS

- Community engagement platform designed to connect citizens and build stronger neighborhoods.
- User authentication system with separate admin portal for community management.
- Intuitive interface for fostering civic participation and community collaboration.
